

# Yamada Vs.

## Head to Head

**Proven Field Service** – with over 28 years of service, Yamada has sold over 100,000 units

**Many major heavy construction equipment manufacturers** sell the KPL-24 as an option on their machinery

**Follower Plate** – metal construction with Buna N wiping seals allowing for a straight or tapered 5 gallon pail

**Unit Weight** – weighing in at 26 lbs., the KPL-24 is 35% lighter than the major competitor. This allows for easier portability and greater stability when the pail is close to empty (*no tipping issues*).

<b>Overall Winner</b>	

**Product has been in the marketplace for under 5 years!!**

**Follower Plate** – One solid piece of Buna N that is fastened to the coupling with wood screws – This design will wear faster and the screws present another potential problem area

**Unit Weight** – weighing in at 35 lbs., this unit is much heavier than the KPL-24 and may tip over when pail is close to empty; held to pail with bungee cords
